

The Barracuda RX

The RX has been designed with one thing in mind- winning races. Based on Wahoo's flagship luxury Barracuda model, the RX has been re-engineered to wring out the last drop of performance. Although the proven racing hull remains the same, our engineers have increased the power to 700 HP at the same time as reducing the weight by 500Kg. The result is a ready-to-race, 90mph hyper-RIB.

The first RX has been purchased by Team Cool Running (www.crrib.co.uk) who will be entering her in a series of challenging off-shore races including the gruelling 12 day 2010 Round Britain RIB Rally.
